

Organisations invited to submit Expression of Interest to present at Cenex-LCV2017

Seminar programme to cover 16 themes

Loughborough, UK, 29 March 2017

Cenex – the UK’s first Centre of Excellence for low carbon and fuel cell technologies and the organiser of the UK’s largest technology showcasing and networking event for the UK low carbon vehicle community – today announced organisations are invited to submit an Expression of Interest (EOI) form to present at Cenex-LCV2017. Taking place on 6 and 7 September 2017, at Millbrook in Bedfordshire, LCV2017 is Cenex’s 10th annual Low Carbon Vehicle Event. The deadline date for the EOI is Friday, 5th May 2017. Forms can be completed via the LCV2017 website: <http://www.cenex-lcv.co.uk/2017/seminar-themes.asp>.

The LCV2017 seminar programme has been designed with two aims in mind. First, it seeks to showcase the latest technology developments and results from research projects. The second aim is to look at the future direction for the low carbon vehicle community to ask and hopefully answer the question of ‘What Next?’ for technology developments and innovation support.

This year’s seminar programme is being developed through the combination of invitations to individuals to present, as well as through organisations submitting an EOI form to present at LCV2017. Presentation opportunities would be of particular value to exhibitors showcasing technology and disseminating projects at the LCV event.

LCV2017 will host the following seminar themes:

- Low Carbon Propulsion Technologies
- Ultra-Low Emission Vehicles: Policy and Market Trends
- Vehicle Light-Weighting and Aerodynamics

- The Automotive Council and UK Capabilities Development
- Grants for Research and Development
- Connected and Autonomous Vehicles
- Digital Engineering, Modelling and Simulation
- Design Engineering, Test and Validation
- Advanced Materials
- Automotive Electronics
- High Value Manufacturing
- Energy for Transport: Alternative Fuels and Energy Infrastructure
- Low Carbon Buses
- Low Carbon Commercial and Off-Highway Vehicles
- Air Quality and Low Carbon Innovation
- Accelerating Energy Efficiency Through Motorsport

Robert Evans, CEO of Cenex says, “Following the success of last year’s expression of interest, we are once again extending our seminar programme by inviting organisations to submit an EOI form to present at LCV2017. We strongly believe that it is the industry that helps shape the future of low carbon vehicles, and we look forward to having some of the very best industry experts disseminating their knowledge to the LCV community. LCV prides itself on its highly topical and comprehensive seminar programme and we look forward to educating, informing delegates at this year’s event.”

Notes to editors:

About Cenex LCV2017

The LCV event (www.cenex-lcv.co.uk) has established its unique positioning for the Low Carbon Vehicle community as the technology showcasing and networking event. LCV2017 will be the 10th in a series of national low carbon vehicle events run by Cenex.

As the UK’s Premier Low Carbon Vehicle Event, LCV attracts UK and international visitors and combines a technology exhibition with broad B2B focus, a Ride & Drive in a test track environment, networking activities and an extensive seminar programme. Each year the

event has grown in size, attracting more delegates from business and academia, as well as earning its reputation as the place to meet key contacts from across the low carbon vehicle community.

Cenex prides itself on ensuring the decision makers of the UK industry attend the event with all major stakeholders, key manufacturers, supply chain representatives and government officials from the UK present. The event attracts a range of customers (Automotive 52%, Energy & Infrastructure 9%, Fleet & Local Authority 7%) and senior managers including those at board level [20%], Senior Engineers [27%] and Product Development Managers [15%].
